Weybridge Assets leading the way with client experience ease of access.

February 10, 2015/Singapore - Weybridge Assets continues to lead the way with modern state-of-the-art client experience for their customers, with ease of access to their personal client accounts and secure corporate website.

With their main headquarters sitting in the financial heart of Singapore, it is not surprising that they lead the industry with ease of access and user friendly products for their clients.

Weybridge Assets have adapted to ever-changing customer habits. With the recent launch last year of their Android-optimized, mobile-responsive, multilingual secure corporate website, They realised that more and more people are using their mobile phones or tablets, with bar and QR scanning Apps installed.

When doing business on the go, with the sending and receiving of emails, accessing personal online files or reading reports, the requirement now for communication between different devices is fundamental and Weybridge Assets are one of the first in the industry to incorporate bank-friendly bar coding on their invoicing.

Now, Weybridge Assets have just made it even easier to navigate to important places on their website by incorporating QR codes on their stationary and printed material, which you can scan direct from your tablet or mobile.

“We continue to adapt to client’ needs in our modern world, and here is another example of doing just that.” Said Mrs. Amelia Tan, Chief Operations Officer (COO) “and Weybridge Assets clients can be sure and confident that all information processed through our servers are secure and encrypted, therefore can be used safely on any device.”

About Weybridge Assets:

Founded in 2004, Weybridge Assets Inc. is a unique financial services provider embracing responsible finance by offering financial services to its clients in an accountable, transparent and ethical manner, specializing in portfolio management, purchase and sale of financial instruments and corporate finance advice.
